Dewatering Solutions

Capability Statement

Our Capabilities | Dewatering Solutions

At XR3 we recognize the urgency for robust water management solutions, especially in during periods of heavily rainfall - particularly for mining sites.

At XR3, we're ready to assist you right away.

Our team specializes in reclamation and rehabilitation, offering comprehensive pit dewatering and water treatment solutions. Whether it's developing strategic plans, supplying specialized equipment and people, overseeing projects, or addressing challenges – we've got you covered and can offer immediate end-to-end assistance.

We specialise in rapid dewatering solutions providing the right equipment at the right time. Our range includes:

- Relocatable water treatment plants
- Water evaporators
- Dewatering Pumps
- Amphibious excavators

Key Features | Dewatering Solutions

- **Specialist Equipment:** Gain access to cutting-edge water treatment equipment, ensuring effective solutions tailored to your unique needs.
- **Rapid Deployment:** Our team can mobilize to your site within 4-6 weeks and demobilize with equal swiftness, ensuring a quick and efficient installation process.
- **Comprehensive Support:** From supply and installation to project management, engineering, and execution, we're committed to ensuring your operational success throughout the operation.
- **Problem Solving:** Our expert team excels in addressing challenges head-on, delivering effective solutions that guarantee client satisfaction and project success.
- **Minimal Infrastructure:** We empower sites to minimize permanent infrastructure, fostering flexibility and efficient resource utilization.

Our team are ready to help with a tailored and seamless approach to suit your water treatment needs.

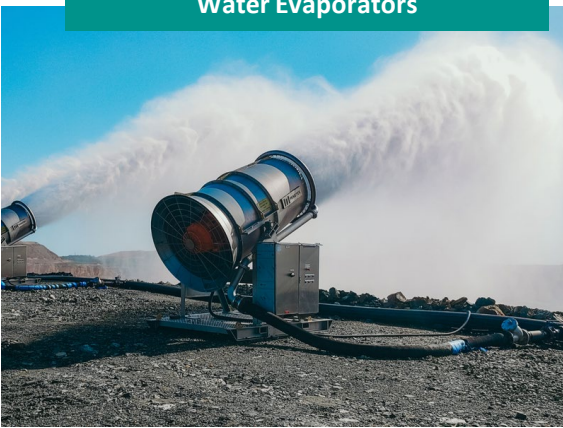

The Equipment | Dewatering Solutions

Relocatable Water Treatment Plants

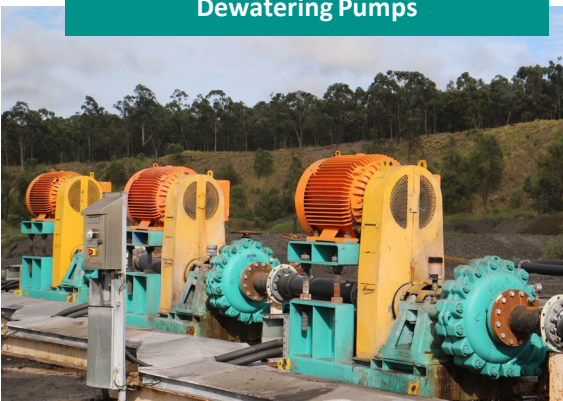

- Relocatable water treatment plants can be mobilized and operational on your site within just 4 weeks.
- Our mine site experienced team is fully equipped to deliver, install, and operate our relocatable equipment, taking care of every aspect for you.
- Our cutting edge plants are modular and easily scalable in modules of 2ML/day to meet your environmental discharge requirements.

Water Evaporators

- Water evaporators are designed for efficient evaporation, utilising advanced technology to accelerate the process.
- Water evaporators operate with minimal environmental impact, ensuring that your dewatering processes are not only efficient but also eco-friendly.

Dewatering Pumps

- Dewatering pumps are designed specifically for the challenges of mining operations. Our skid-mounted pumps are versatile, capable of being swiftly deployed for dewatering both surface and underground operations.
- Built to withstand the rigors of mining environments, our dewatering pumps deliver reliable performance when you need it most.

Amphibious Excavator

- Designed to navigate challenging terrains with extremely low ground pressure, our amphibious excavators offer unparalleled accessibility making them perfect to access previously flooded or saturated areas.
- Our amphibious excavators currently support hydraulic mining for tailings reclamation as well as pit re-entry and recovery.
