XR3 | Our Capability

At XR3 we recognise the urgency for robust water management solutions, especially during periods of heavily rainfall and particularly for mining sites.

We're ready to assist you right away.

Our team specialises in reclamation and rehabilitation, offering comprehensive pit dewatering and water treatment solutions. Whether it's developing strategic plans, supplying specialised equipment and people, overseeing projects, or addressing challenges – we've got you covered and can offer immediate end-to-end assistance.

Our Range Includes:

Relocatable Water
Treatment Plants

Water Evaporators

Dewatering Pumps

Amphibious
Excavators

Key Features:

- **Specialist Equipment:** Gain access to cutting-edge water treatment equipment, ensuring effective solutions tailored to your unique needs.
- **Rapid Deployment:** Our team can mobilise to your site within 4-6 weeks and demobilise with equal swiftness, ensuring a quick and efficient installation process.
- **Comprehensive Support:** From supply and installation to project management, engineering, and execution, we're committed to ensuring your operational success throughout the operation.
- **Problem Solving:** Our expert team excels in addressing challenges head-on, delivering effective solutions that guarantee client satisfaction and project success.
- **Minimal Infrastructure:** We empower sites to minimise permanent infrastructure, fostering flexibility and efficient resource utilisation.

Our team are ready to help with a tailored and seamless approach to suit your water treatment needs.

The Equipment

Water Evaporators

A rapid solution to excess water challenges in your mining operations. Water evaporators are designed for efficient evaporation, utilising advanced technology to accelerate the process. A single evaporator can evaporate up to **1.5 million litres per day** and multiple units can be installed to achieve the required water consumption.

Dewatering Pumps

Our dewatering pumps are designed specifically for the challenges of mining operations. These skid-mounted pumps are versatile, capable of being swiftly deployed for dewatering both surface and underground operations.

Relocatable Water Treatment Plants

Our cutting-edge relocatable water treatment plants are designed to treat up to **1.5 ML/day** to meet your environmental discharge requirements.

- Easily relocatable and scalable using multiple modules
- Environmentally conscious without compromising efficiency.

Amphibious Excavator

Designed to navigate challenging terrains, amphibious excavators offer unparalleled accessibility and superior efficiency making them the perfect solution to access previously flooded or saturated areas including tailings and pit re-entry in mine sites.

If you're looking to experience innovation and excellence at your business, get in touch with us today.
