# XR3 | Our Capability

At XR3 we recognise the urgency for robust water management solutions, especially during periods of heavily rainfall and particularly for mining sites.

**We're ready to assist you right away.**

Our team specialises in reclamation and rehabilitation, offering comprehensive pit dewatering and water treatment solutions. Whether it's developing strategic plans, supplying specialised equipment and people, overseeing projects, or addressing challenges – we've got you covered and can offer immediate end-to-end assistance.

## Our Difference

Through strategic partnerships, we provide efficient and cost-effective water evaporation solutions tailored for the mining, industrial, and environmental industries. Multiple units can be installed to achieve the required water consumption.

### End-to-End Management

Our team assesses site-specific requirements, oversees installation, and provides ongoing monitoring to ensure optimal system performance.

### Flexible Financing and Hire Options

We offer tailored financial solutions, including leasing and hire arrangements, ensuring accessible and scalable water management solutions.

## Performance

Based on an average efficiency of 50%, a **single evaporator** can evaporate:

 **18.75L/sec**  
**~1.62ML/day**

## Models and Specifications

Our range of water evaporators includes models with varying capacities to suit different levels of operational demands.

We provide complete, ready-to-deploy evaporation system packages, which can include:

- Evaporator units (single or multiple configurations)
- Electrical control systems (MCC)
- Booster pumping systems
- Poly pipe and electrical cabling packages

| Model         | Power            | Water Flow            |
|---------------|------------------|-----------------------|
| <b>ZT-120</b> | 90kW<br>(120HP)  | 37.5L/sec<br>(600GPM) |
| <b>ZT-100</b> | 75kW<br>(100HP)  | 25L/sec<br>(400GPM)   |
| <b>ZT-70</b>  | 37.5kW<br>(50HP) | 12.5L/sec<br>(200GPM) |
